FACTORY FLOOR: SPINNING LINE, GARDEN ROUTE

WHO WE ARE

FROM RAW COTTON TO FINISHED GARMENT

Vic Bay has been manufacturing apparel since 1990, growing from a family T-shirt business in KwaZulu-Natal into one of Southern Africa's established promotional apparel operations. Spinning yarn, knitting greige fabric, dyeing and finishing fabric, cutting panels from finished fabric and garment assembly (sewing) all takes place in our own factories in the Garden Route. Control over these processes ensures consistency and quality.

VERTICALLY INTEGRATED

Every stage from yarn to finished garment runs under one roof.

SUSTAINABILITY

Using the latest, state of the art technology ensures optimal use of water and electricity.

CONSISTENT ON REORDER

Colour, fit and fabric hold from one batch to the next.

SUPPLIED NATIONALLY

Distributors in Johannesburg, Cape Town, Durban and Gqeberha, and into Namibia.

WHAT'S NEW

Four styles added to the range this season, led by the fleece track pants and the Premium T-shirt 220g. Full specifications follow in the sections above. Ask your nearest branch for current stock.

EVERYDAY ACTIVE COMFORT

FLEECE TRACK PANTS P 22

260gsm brushed cotton fleece with an elasticated drawcord waist, side pockets and ribbed ankle cuffs. Pairs with the hoodie and the zip hoodie.

NEW PREMIUM TEE

PREMIUM T-SHIRT 220G P 05

The heaviest tee in the range at 220gsm. Rib crew neck with taped neckline, durable double stitching throughout. To 4XL.

ALSO NEW THIS SEASON

ZIP HOODIE P 21

Full-zip hooded fleece, the winter staple.

WOMEN'S DRY FIT GOLFER P 18

Fitted dry fit, XS to 2XL in five colours.

BRANDING OPTIONS

EMBROIDERY

Designs are stitched directly onto the garment on multi-head machines from digitised artwork. Each head holds up to nine colours, and multi-coloured designs cost the same as single colour.

SUITABLE GARMENTS

All garments except the Lightweight T-shirt, Platinum T-shirt, V-neck T-shirt, Kids' T-shirt and Kids' Long Sleeve T-shirt.

SCREEN PRINT

Artwork is etched onto mesh screens and ink is pushed through onto the fabric, then cured under heat. Each colour needs its own screen.

SUITABLE GARMENTS

All garments, including fleece and track pants.

SUBLIMATION

A reverse image is printed onto heat-resistant transfer paper and pressed into polyester fabric, so the print becomes part of the cloth.

SUITABLE GARMENTS

Dry fit T-shirt and the dry fit golfers: men's, women's and kids'.

HEAT TRANSFER

A digital print on vinyl is cut, lined up and pressed onto the fabric. Good for small runs and detailed one-offs.

SUITABLE GARMENTS

All garments except the Oxford jackets.

DIRECT TO GARMENT

Inkjet printing straight onto the garment. Speciality inks are absorbed by the fibres, giving a vibrant image with good durability and washability.

SUITABLE GARMENTS

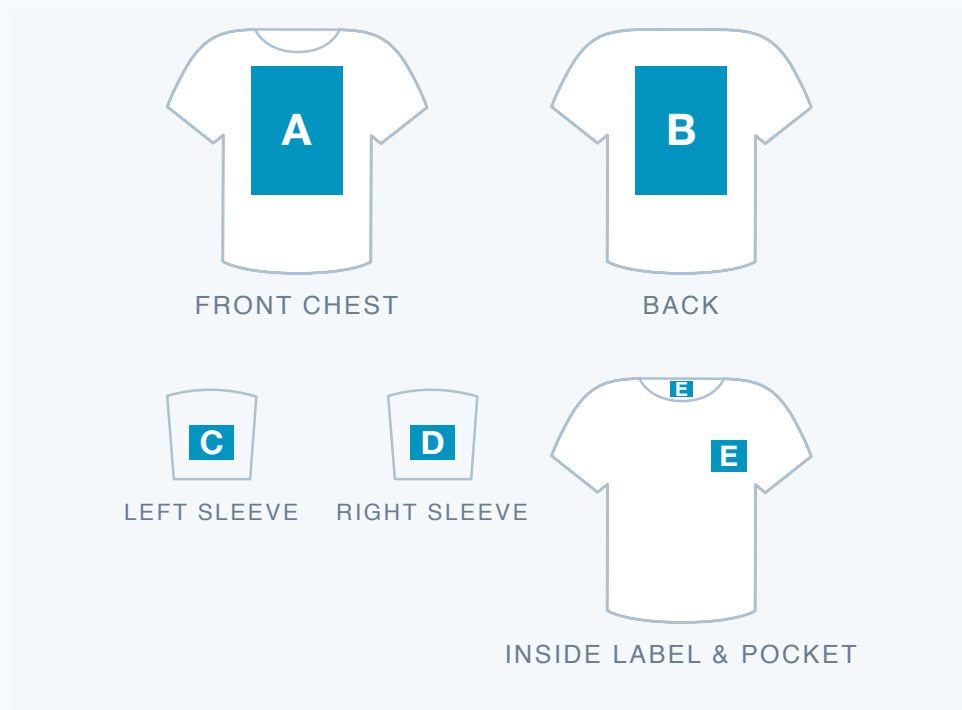

All garments except the Oxford jackets.

Five ways to brand a Vic Bay blank. Suitability is listed on each product page; your branch will advise on artwork and minimums.

BRANDING POSITIONS

These are our most common placements. Want your branding somewhere else on the garment? Just ask your nearest branch.

DTF, EMBROIDERY & SCREEN PRINT

SUBLIMATION

ARTWORK AND APPROVALS

Supply vector or high-resolution artwork in one of these formats. Your branch confirms placement, size and minimums before production.

Sublimation prints all over the item: to the edges, seams and collars, at any size you need. Dry fit T-shirt and dry fit golfer only.

NEED A COLOUR WE DON'T STOCK?

If you are looking for a specific colour that is not in our standard range, request a custom colour to suit your garment needs.

STEP 1

SEND YOUR COLOUR

Send us a fabric swatch or the Pantone code of the colour you need.

STEP 2

CHOOSE THE STYLE

Choose the Vic Bay style. We confirm the minimum order quantity for that style.

STEP 3

APPROVE AND PRODUCE

Once the custom-colour swatch is approved and a 50% deposit is paid, production starts.

PRODUCTION PROCESS

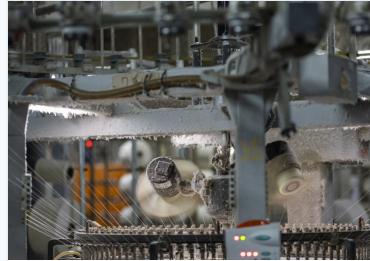

All Vic Bay garments are made at our vertically integrated factory on the Garden Route. From cotton to delivery, we monitor and improve every step of the local value chain.

STEP 1

SPINNING

Ginned cotton is beaten, picked and carded into an even sliver, then thinned, twisted into yarn and wound onto bobbins.

STEP 2

KNITTING

Yarn is circularly knit into a seamless tube for the body, a separate tube for every garment size.

STEP 3

DYEING

Cloth is washed, bleached or dyed to a consistent colour, pre-shrunk to international standards and finished for a soft hand feel.

STEP 4

CUTTING

Automatic cutters take bodies and sleeves out of the tube several stacks at a time, with collar rib cut per body size.

STEP 5

SEWING

Bodies, sleeves and collars are assembled on a batch line, then checked, folded, packed and sent to the four branches.

SIZE GUIDE

Width is measured across the bust, 2cm below the armhole. Length runs from the highest point of the shoulder to the bottom hem.

Tolerance ± 2 cm width and length.
5–8% shrinkage after first wash.
